SUSHKÓ ANDRIY

Frontend (React) Developer

For more than five years, I've been involved in web development. For the past three years, I've focused on React, Redux, and related technologies, including backend solutions like Node.js, Express.js, Nest.js, and MongoDB. As a former entrepreneur, I am skilled in client collaboration and communication and have a strong business sense. I am looking for a team with strong technical expertise where I can contribute to the business, develop my skills, and work on impactful projects.

- Photoshop, Figma

LANGUAGE

Ukrainian - Native

English - Upper Intermediate - B2

EDUCATION

Master's Degree
Ukrainian State University of Science and Technologies, Dnipro
2002 - 2007

WORK EXPERIENCE

November 2023 - Present - QPart

Frontend Developer

Tech Stack: HTML, CSS, JavaScript, jQuery, TypeScript, React, Redux, RTK, Vite, Next.js, Node.js, Express.js, NestJS.

I currently work in a manufacturing company where I develop front-end applications for production automation, accounting, and security. My responsibilities include creating interfaces to streamline processes within the company.
Achievements:
- Implemented a classical client-server architecture to replace the chaotic and outdated approach. This made the system predictable and easy to maintain. As a result, production downtime was reduced by 50 person-hours per week, minimizing company losses.
- Implemented universal code style conventions across all projects and facilitated the transition from ES5 syntax to ES6 syntax

These changes contributed to increased productivity and competitiveness.

February 2022 - October 2023 - Mustache Development

Frontend Developer

Tech Stack: HTML, CSS, JavaScript, React, Redux, Next.js.

Creating websites for hosts, agencies, and photographers. I am responsible for front-end development tasks, including coding, programming, and deploying web applications. I have implemented web projects for 5 companies.

2018 - January 2022 - Event Agency "Luty"

Part-time Frontend Developer

Tech Stack: HTML, CSS, JavaScript, PHP.

Web developer who handled the full cycle of website development related to the company's projects. The result of my work was four fully developed websites. They fulfilled their marketing function and brought profit to the company.

2009 - 2022 - Event Agency "Luty"

Manager of Company

My own enterprise, which developed various projects in the hospitality industry (event organization, show programs, restaurant services).

2007 - 2009 - Construction Company "Arcon"

Civil Engineer

Collaborated with a team to design and coordinate documentation for construction projects. Played a key role in the monitoring and control of work performance, ensuring project efficiency and maintaining high-quality standards.

PROJECTS

Chef assistant

HTML, CSS, JavaScript, React, Redux, Express.js, MongoDB, Material UI, React Router
My startup. A SPA to work with technological cards for restaurants. It is created in cooperation with existing companies to meet the real needs of production. It is currently being tested in production conditions.
